---

## Experience

### Backend Developer

JOJI Enterprise · Ekiti, Nigeria

10/2024 - Present

Developed and maintained scalable server-side applications, optimized database management, and integrated APIs to support seamless user experiences. Collaborated with front-end teams to ensure efficient data flow and system performance, enhancing overall platform functionality.

### Fullstack Developer

Font Zero · Kogi, Nigeria

05/2024 - Present

Led the development of a modern icon library, working on both front-end design and back-end functionality. Built responsive user interfaces, managed server-side operations, and optimized the platform for performance and scalability. Collaborated with design and development teams to deliver a seamless, user-friendly experience.
